AGENDA 2030: AN OPPORTUNITY FOR THE BASQUE COUNTRY

On 25 September 2015 the United Nations General Assembly unanimously approved its 2030 Agenda for Sustainable Development. This is a universal, integral, transformational action plan seeking to move sustainable human development forward on the social, economic and environmental fronts.

2030 Agenda's commitment with the promotion of the territorial dimension and its adaptation on a local scale is one of its ground-breaking characteristics. Since the initial phases of definition of the Agenda, both the United Nations and the European Commission have been emphasising the territorial spheres closest to citizens. We aim to continue to foster participation by Regions, sub-state Governments or Stateless Nations, of which the Basque Country is one example. We have the proximity and the specific knowledge of society's demands, and also the competences and the resources to guarantee the best possible response to its needs.

2030 Agenda is considered as part of a global scenario, and the United Nations stipulates that each territory must negotiate this path in due consideration of its own circumstances. The Sustainable Development Goals do not tell us what we must do, but rather define a context that helps us improve our public policies and set priorities in accordance with our territorial reality. Euskadi is taking up the challenge of bringing our efforts into line with the Sustainable Development Goals (SDGs). This is the commitment of a committed Country.

We see 2030 Agenda as an opportunity for the Basque Country because it is fully in step with our priorities: human development guaranteeing essential services for all, and sustainable growth generating job opportunities to higher levels of quality. This is the Basque model of growth and social welfare, now strengthened by the presentation of Agenda Euskadi - Basque Country 2030.

Our objective is to join forces and show our contribution to the global challenge of sustainable human development. We share the United Nations' vision of a world focusing on people, committed to protecting the planet and peaceful co-habitation, capable of generating prosperity through a model of alliances or partnership. This Agenda defines Euskadi's future vision in the local and global scenario, a challenge we must undertake in the spirit of what we call "auzolana", cooperation and a shared workload for the common good.

Iñigo Urkullu
Lehendakari (President)

1. United Nations 2030 Agenda for Sustainable Development

2030 Agenda for Sustainable Development, builds on the Millennium Development Goals 2000–2015, with a fresh thrust to the commitment for achievement of the 17 Sustainable Development Goals in five spheres of critical importance to humanity and the planet, with a clear mission and the promise that “no one will be left behind”.

People

End poverty and hunger, in all their forms and dimensions, and to ensure that all human beings can fulfil their potential in dignity and equality and in a healthy environment.

Planet

Protect the planet from degradation, including through sustainable consumption and production, sustainably managing its natural resources and taking urgent action on climate change, so that it can support the needs of the present and future generations.

Peace

Foster peaceful, just and inclusive societies which are free from fear and violence.

Partnership

Mobilise the means required to implement this Agenda through a revitalised Global Partnership for Sustainable Development, based on a spirit of strengthened global solidarity, focused in particular on the needs of the poorest and most vulnerable and with the participation of all countries, all stakeholders and all people.

Prosperity

Ensure that all human beings can enjoy prosperous and fulfilling lives and that economic, social and technological progress occurs in harmony with nature.

The 17 Sustainable Development Goals and the 169 targets implementing them are integrational and indivisible, and cover the three dimensions of Sustainable Development (social, economic and environmental issues).

Agenda Euskadi – Basque Country 2030 has been designed as follows:

Integrating

Integrational and indivisible role, and covering three dimensions of sustainable development (social, economic and environmental issues).

Transversal

It covers all areas of public policy and has an impact on them all, but its leadership is not confined to a public policy in a specific sector.

Time-based

Conceived for covering the period 2030. Notwithstanding the foregoing, the initiatives to be developed are divided into 4-year periods, coinciding with the Basque Government's legislative period. Consequently, the Agenda presented here will be the 1st Agenda Euskadi – Basque Country 2030, and its term will run until the end of the 11th Legislature in the year 2020.

Specific

Chiefly focusing on the issues and commitments in respect of which it is able to take action. Hence it must specify the commitments it undertakes in order to make its performance more effective.

Clear

A simple, clear and user-friendly tool, setting out only the definitions of the targets, the planning instruments, the legislative initiatives and indicators, which are elaborated on in the Government Programme.

Participational

Permanently open to multilevel and multiagent participation.

Adaptable

Monitoring, assessment and participation will make a "live", and adaptable Agenda, undertaking any changes considered necessary and advisable within a process of continuous improvement.

International

A universal, global and international scheme; with a commitment to action taken by the Basque Government to achieve the Sustainable Development Goals as part of the Euskadi Basque Country 2020 Strategy.

2.1. Alignment with the Government Programme

Agenda Euskadi – Basque Country 2030 reflects the extent of alignment and contribution of the Government Programme, and the sectoral policies implementing it in terms of the goals and targets relating to the 17 SDGs.

This links it to the Government Programme and the United Nations Agenda, providing a response to the Agenda in due consideration of the fact that the Sustainable Development Goals were not devised to tell us what we must do, but to define a common universal context that helps us set priorities in accordance with our territorial reality.

The 11th Legislature from 2016 to 2020 is aligned with the Sustainable Human Development Strategy through the following:

- 15** Country Objectives
- 15** Strategic Plans
- 54** Sectoral Plans
- 28** Legislative Initiatives
- 175** Commitments
- 650** Initiatives
- 100** Indicators

The alignment of the Government Programme with the United Nations 2030 Agenda can be seen in the following scheme:

The 1st Agenda Euskadi – Basque Country 2030 covers the period between 2017 and 2020, which matches the Government Programme of the Autonomous Basque Community's 11th Legislature.

This 1st Agenda Euskadi– Basque Country 2030 homes in on the objectives and commitments of the Government Programme most closely linked to the **Sustainable Development Goals**, and goals which will be specifically monitored using the governance channels and instruments established by the Agenda.

This means that the 1st Agenda Euskadi – Basque Country 2030 is structured around the **17 Sustainable Development Goals** on Agenda 2030, which are linked to the **15 Country Objectives** and implemented in **100 Targets**; it identifies the commitments of the Euskadi 2020 Government Programme which have the closest links to the 17 SDGs; and it focuses on issues of common interest, ignoring any merely domestic issues which are of no global interest.

Each of the 17 Goals in Agenda Euskadi – Basque Country 2030 is deployed in a total of 100 Targets associated with the commitments of the Euskadi 2020 Government Programme linked to Agenda 2030 for sustainable development.

The number of Targets for each Goal varies between 3 and 10 depending on the competences of the Basque Government, and therefore their scope is not the same for each Goal.

When the Targets entail specific planning or the approval of legislative initiatives, the Agenda identifies the **Plans and Legislative Initiatives** associated with each of them.

Finally, Agenda 2030 for Sustainable Development stipulates that each country must adapt the global indicators to its own reality, addressing the main social, economic and environmental problems and as well as associating them with specific targets to be met by 2020, 2025 and 2030.

Pursuant to this, Agenda Euskadi – Basque Country 2030 associates result indicators with each of the 17 Goals, to make up a dashboard with **50 Indicators**, including the Human Development Index by way of a synthetic international benchmark indicator.

This definition of the indicators is open in the sense that, as the indicators of the United Nations and the European Union develop, so the Agenda Euskadi – Basque Country 2030 indicator dashboard adapts to the modifications.

3. Governance and Coordination of Agenda Euskadi - Basque Country 2030

Due to the transversal and integral nature of Agenda Euskadi - Basque Country 2030, this 1st Agenda for all courses of action to be taken by the Government is to be led and coordinated by the Office of the President, specifically in coordinated action by the General Secretariats of the President's Office and the External Action department.

The General Secretariat in the President's Office, as part of its function to coordinate action by the Government; the General Secretariat of the External Action department, as part of its function to foster and promote the coordination of external action by the Government in connection with the Euskadi Basque Country Internationalisation Framework Strategy 2020.

An annual monitoring report will be produced on the 1st Agenda Euskadi - Basque Country 2030, which will showcase the Basque Country's contribution to worldwide effort and work to achieve the Agenda 2030, and set out its contribution to the annual report about the progress to achieve the UN's Sustainable Development Goals.

This report will be submitted to the Basque Parliament.

The various areas of the Government will be involved in the Agenda 2030 governance model through the Basque Government's External Action department's Interdepartmental External Action Committee.

The Institutional participation of the rest of the institutions in the Autonomous Community of Euskadi to manage the Agenda Euskadi - Basque Country 2030 will take place within the External Action department's Interinstitutional Committee, composed of the Basque Government, the Provincial Councils, the 3 Basque Capital cities and the Association of Basque Municipalities (Eudel). Lastly, the social agents with a projection in the Euskadi's External Action will contribute through the External Action department's Advisory Committee, chaired by the Basque President.

This framework will be completed by the participational framework of social, economic and cultural agents in each of the Government areas responsible for achieving goals and targets on Agenda Euskadi - Basque Country 2030.

4. Resources of Agenda Euskadi – Basque Country 2030

The resources of Agenda Euskadi – Basque Country 2030 will materialise in portions of the Basque Country's General Budgets with direct links to the Sustainable Development Goals.

These items focus on promoting equal opportunities for particularly vulnerable groups (women, children and the migrant population), reducing inequality and improving environmental management and the conservation and restoration of ecosystems; they also address investment in social protection, health, education, nature conservation, the fight against climate change and development cooperation policy.

These budget items will be identified initially in 2018, to enable them to be monitored in the years 2019 and 2020.
