REUNION ISLAND

3RD INTERNATIONAL CONFERENCE ON CLIMATE AND BIODIVERSITY

Reunion Island, a French and European island in the Indian Ocean, is hosting the **3rd International Conference on Climate and Biodiversity, with this year's edition 100% online.**

Tuesday 8th December 2020

Considered as a hotspot for global biodiversity, Reunion benefits from a strategic geographical location in the heart of the Indian Ocean.

The Regional Council of Reunion Island will be hosting this event's 3rd edition, focussing on the creation of a Regional Biodiversity Agency (ARB) serving the greater Indian Ocean. The objective is to ensure that this agency is open to the whole region.

The oceans and their biodiversity know no borders and concern everyone all over the world!

The Regional Council of Reunion has launched its programme entitled "The Green Revolution of Reunion, an island of solar energy and innovation". Working alongside our international partners (regions4, Climate Group, Oru Fogar, WWF), we have already hosted two international conferences on the themes of climate & energy and adaptation to climate change.
